Join the Palos Verdes Peninsula Land Conservancy and Art to Grow On, Inc. for a family coastal hike and children's art workshop. We will begin with a short hike Down Discovery Trail and train our "scientific eye" with fun activities along the way in order to better observe the subtle patterns of color and texture in nature. Using these skills, we will gather our impressions of the spring coastal landscape and the young artists will paint their own masterpieces. Meet at the Fishing Access parking lot between the Lighthouse and Terranea Resort.
